PROJECTS

Smart Credit Scoring & Loan Eligibility Platform

- Developed a fintech-based credit scoring platform using Python (Flask) and MySQL to assess customer creditworthiness and loan eligibility.
- Implemented a credit scoring engine that generated scores ranging from 300 to 900 based on financial history, income details, repayment behavior, and credit risk factors.
- Designed and developed modules for customer financial profiling, credit history tracking, and automated loan eligibility assessment.
- Generated detailed credit reports and loan recommendations to support financial decision-making.
- Built a comprehensive analytics dashboard for visualizing credit scores, risk analysis, financial insights, and eligibility reports.

Webpulls – AI SEO Audit Tool (Team Project at Zozweb Softwares Pvt. Ltd.)

- Contributed to the development of an AI-powered SEO audit platform for analyzing website performance, search engine visibility, and optimization opportunities.
- Developed and enhanced modules for on-page SEO analysis, technical SEO auditing, and website performance evaluation using PHP (Yii2) and python (Flask).
- Implemented features for meta title and description analysis, heading structure validation, image optimization checks, and keyword analysis.
- Integrated page speed and performance assessment modules to identify optimization opportunities and improve website loading times.
- Developed interactive dashboards and reporting systems to present SEO insights, audit results, and recommendations in a user-friendly format.

Adgro Clinic ERP & Billing Management System

- Developed a comprehensive Clinic ERP and Billing Management System using PHP and MySQL to streamline daily clinic operations.
- Designed and implemented modules for Customer Management, Service Management, Product Inventory, Billing, and Invoice Generation.
- Built a centralized system to manage patient/customer records, treatment services, products, and transaction history.
- Created detailed reporting modules for sales analysis, service performance, customer records, and revenue tracking.
- Implemented secure authentication and role-based access control for administrators and staff users.
- Developed responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap for seamless user experience.

MERCELYS ERP Management System

- Developed a complete ERP system for ice cream business management using PHP and MySQL.
- Implemented Product Management module to manage inventory and product details.
- Developed Quotation and Invoice Management systems for customer billing.
- Created Supplier and Purchase Management modules to track procurement activities.
- Implemented Customer Management for maintaining customer records and transaction history.
- Developed Return Bill functionality for handling product returns and adjustments.
- Generated Sales Reports with detailed analytics and performance tracking.
- Built Ledger Management module for financial transaction monitoring and accounting records.
- **Key Modules:** Products, Quotations, Suppliers, Purchases, Customers, Return Bills, Invoices, Sales Reports, Ledger Management.

Avalangadi – E-Commerce

- Developed a multi-vendor e-commerce web application using PHP, Yii2 MVC Framework, and MySQL, providing a complete online shopping platform.
- Implemented a three-module architecture consisting of Admin, Seller, and User modules for efficient platform management.
- Developed features such as product management, shopping cart, order placement, order tracking, and seller product management.

- Designed a responsive and user-friendly interface using HTML, CSS, JavaScript, and Bootstrap to ensure a smooth shopping experience.
- Created an order management system with real-time order status updates, inventory management, and sales monitoring.
